

**AppIn No. 10/814,612**  
**Reply to Office Action of April 21, 2005**

**Amendments to the Abstract:**

Disclosed herein is a new variety of *Senecio* plant having a semi-dwarf, obconical shape[[d]] with abundant branching and small leaves. The flowers~~scapitula~~ are single and small, the petals~~ray florets have having~~ a vivid violet color and the disk~~disc floret~~ color is brilliant violet. The blooming time is early and flowering duration is longer than *Senecio cruentus*. 'Sunsenebabu' has low fertility.
